

# Nano Cell Mask Treatment

The latest generation of face mask, designed and created to:

- Restructure the skins hydrophilic film.
- Increase and retain hydration of the skin
- Introduce active cosmetic principles into the skin.

Nano Cell masks are made from bio synthesised nano fibres, they have been formulated using the most advanced technologies. They are the perfect tool to combat daily aggressions and an ideal compliment to any skin care or medical aesthetic treatment.

- **Hydrating**

Increase hydration, induces cellular respiration and stimulates cell regeneration. Visually improves the appearance of the skin.

- **Whitening**

Suppresses the formation of melanin pigment, producing a whitening effect on the skin.

- **Anti- Wrinkle**

Stimulates the formation of collagen, and elastin. Diminishes fine lines and wrinkles, rejuvenating skins appearance.

Treatment	Time	Cost
Nano Cell Mask	30 mins	£20.00

## Transdermic Roller or Collagen Induction Therapy [C I T ]

Transdermic Roller is a revolutionary needle device, designed to perforate the skin to increase active ingredient absorption and stimulate the production of natural collagen within the skin. Our needles sizes make this a safe treatment with no 'down time', suitable for all skin types.

The Transdermic Roller needles selectively targets dermal structures, whereby it can be 'tricked' into producing new collagen in response to the perceived injury, whilst the cocktail of active ingredients are absorbed into the skin by means of Meso - Therapy.

Vitamin C - Hydrates, Fights free radical damage, Reduces Pigmentation.

Organic Silicon - Collagen Repair

D M A E - Lifts and tones the skin

Dexpanthea - Reduces Pigmentation.

The results are progressive over a series of treatments as the new collagen and elastin molecules need time to mature into a well organised matrix in the dermal layers of the skin. This creates volume from within the skin, plumping out fine lines, wrinkles and acne scars, along with overall improvements in skin tone, sun damage, superficial scarring and ageing skin.

This course of treatments achieves skin resurfacing benefits and provides outstanding results in the treatment of:

- Fine Lines and Wrinkles
- Acne and Acne Scars
- General Signs of Ageing
- Spots- Pimples
- Tired looking skin
- Pigmentation
- Sun-damage
- Cellulite, Loose Skin and Stretch Marks

Treatment time 1hour

Single treatment £100 Course of 5 treatments £375 Course of 10 treatments £700

Treatments can be taken up to 3 weeks apart, although weekly treatment is strongly advised for neglected, unhealthy skin and more problematic conditions.

A £50 deposit is required upon booking; all courses must be paid for in full at start of treatment.
